

Are you burning fat or carbs?

Know your body's fuel source, in real time.

Most health tools tell you what you did. We show you what is happening now.

Concept renders — the actual research prototype will look different.

WHO WE ARE

We are a Finnish startup built by experts in the wearable technology industry.

WHAT WE'RE ASKING

We're in early discovery, not selling anything. Your feedback helps us spot rough edges before launch.

Become a beta tester and get our first device for free

Recruiting final research participants — 60-minute chat, online or in Helsinki

No prep, no medical data needed

We're selecting up to 100 participants to test our first prototype for two months from early 2027, in the Helsinki region

Light feedback once a week, and the device is yours to keep

Beta timing depends on closing our funding round.

It's an early prototype and will have rough edges. Finding them is why we need you.
